DETERGENTS ENZYMATICS

An enzyme is a protein produced by a living organism. Enzymes are present in our body and play a vital role in our life cycle (digestive system).

The enzymes used in Realco solutions come from bacteria, yeasts or fungi. Obtained by fermentation, they are therefore 100% renewable and biodegradable.

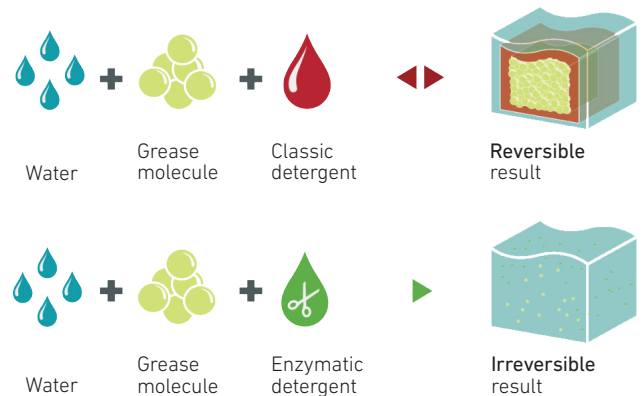

An enzyme works like a pair of scissors that cuts organic molecules into water-soluble microparticles. It can cut up to 3 million molecules per second and can work in synergy with other cleaning agents.

Realco rigorously selects the most efficient enzymes to effectively eliminate the stains present in cooking: fat, animal or vegetable protein, starch, etc.

For all organic soils, the enzyme is much more effective than petrochemical solutions. The detergent enzymatically transforms organic dirt irreversibly into water-soluble residues. This advantage makes the enzyme an ultra-powerful cleaning agent!

The advantages of an enzymatic detergent product:

1. Deeper cleaning performance
2. Maintaining a high performance tool (pH neutral)
3. Ease in the working process
4. Saving water, time and energy
5. Increased efficiency of treatment plants
6. Participation in sustainable development

The differences with a traditional detergent product:

- With an enzymatic detergent, there is no need to scrape or rub the soil. It is the application time of the product that will determine its effectiveness. The longer the application time, the more effective the enzymes will be.
- Dosing enzyme products above the recommended dose will not improve its effectiveness. The right dosage will allow the enzymes to work properly without saturation of the medium.

THE REPA GROUP offers you its selection of Realco enzymatic products suitable for use in the HoReCa fields.

We have also selected a range of conventional Realco detergents to complete the enzymatic plage.

Find these items and their documentation, as well as the complete range of detergents on our website

DETERGENTS

ENZYMATIC DETERGENTS

Photo	LF Code	GEV Code	Product	Format	Quantity	Use	Purpose
1	3092226	LF3092226	Degres L +	liquid	5 l	general	disinfectant detergent for floors, walls, worktops, evaporators...
2	7123779	LF7123779	Powerzym	powder	1 kg	general	multipurpose renovating detergent
3	3092225	LF3092225	Enzymix L	liquid	5 l	general	preventive & curative maintenance of pipelines, avoids clogging
4	3092224	LF3092224	Supodor	liquid	1 l	general	odor destroyer preventing clogging in installations
5	7113800	LF7113800	Fritzym	powder	42 x 50 g	cooking	degreasing detergent for fryers & soaking
6	7151358	LF7151358	Dishwasher tabs	tablets	200 pcs	dishwashing	detergent for the maintenance of dishwashers
7	7151357	LF7151357	Degrazym	liquid	5 l	dishwashing	detergent for manual dishwashing & soaking

All products are supplied with precise application instructions for optimal use

CONVENTIONAL DETERGENTS

Photo	LF Code	GEV Code	Product	Format	Quantity	Use	Purpose
1	3092184	LF3092184	Reacid 1	liquid	5 l	general	universal descaler for dishwashers, ovens, coffee machines, bain-marie...
1	7152026	LF7152026	Reacid 1	liquid	18 l	general	universal descaler for dishwashers, ovens, coffee machines, bain-marie...
