

Small Changes, Big Impact

-  **Save Water**
-  **Save Energy**
-  **Save Money**

- **Low flow rate**
Reduced flow rate of only 4 L/Min at 3 bar with increased cleanability.
- **Certified Quality**
Reliable materials as food-grade rubber and stainless steel components. Plastics and metals in contact with drinking water are DVGW Hygiene certified.
- **Sustainable solution**
Low water consumption saves water, sewage and energy costs.
- **Higher efficiency**
Lower flow but better cleaning efficiency than higher-flow products.
- **Advanced technology**
Progressive water flow and heat-insulating components.
- **Heavy-duty components**
Highly efficient and durable with ergonomic design.

 **KLARCO**

Spray Gun Savings

KLARCO's **low flow 4l spray valve** reduces water usage without giving up rinsing efficiency.

Standard: 16 l/min
Klarco low flow: 4 l/min
